INSURANCE
MATHEMATICS & ECONOMICS

Author index Volume 18

Bäuerle, N., Some results about the expected ruin time in Markov-modulated risk models 119–127
Brockett, P.L., R.C. Witt, B. Golany, N. Sipra and **X. Xia**, Statistical tests of stochastic process models used in the financial theory of insurance companies 73–74
Broffitt, J.D., On smoothness terms in multidimensional Whittaker graduation 13–27

Corradi, C., On the estimation of smooth forward rate curves from a finite number of observations: A comment 115–118

Dhaene, J., see **Goovaerts, M.J.** 81–85
Doray, L.G., UMVUE of the IBNR reserve in a lognormal linear regression model 43–57

Frey, A. and **V. Schmidt**, Taylor-series expansion for multivariate characteristics of classical risk processes 1–12

Gerber, H.U. and **E.S.W. Shiu**, Actuarial bridges to dynamic hedging and option pricing 183–218
Gerrard, R. and **S. Haberman**, Stability of pension systems when gains/losses are amortized and rates of return are autoregressive 59–71
Golany, B., see **Brockett, P.L.** 73–74
Goovaerts, M.J. and **J. Dhaene**, The compound Poisson approximation for a portfolio of dependent risks 81–85

Haberman, S., see **Gerrard, R.** 59–71
Hesselager, O. and **R. Norberg**, On probability distributions of present values in life insurance 35–42

Kalb, G.R.J., Kofman, P. and **T.C.F. Vorst**, Mixtures of tails in clustered automobile collision claims 89–107
Kofman, P., see **Kalb, G.R.J.** 89–107

Lin, X., see **Willmot, G.E.** 29–33

Møller, C.M., Aspects of prospective mean values in risk theory 173–181

Norberg, R., see **Hesselager, O.** 35–42

Schmidt, V., see **Frey A.** 1–12
Shiu, E.S.W., see **Gerber, H.U.** 183–218
Sipra, N., see **Brockett, P.L.** 73–74

Vorst, T.C.F., see **Kalb, G.R.J.** 89–107

Wang, S., Ordering of risks under PH-transforms 109–114
Willmot, G.E. and **Lin, X.**, Bounds on the tails of convolutions of compound distributions 29–33
Witt, R.C., see **Brockett, P.L.** 73–79

Xia, X., see **Brockett, P.L.** 73–79
